

TRAVELGLOBE DOVeQUANDO

Questa tabella è un aiuto alla programmazione dei viaggi. Può essere utilizzata partendo dalla domanda "QUANDO ANDARE?" oppure "DOVE POSSO ANDARE IN...". Si basa principalmente sui dati climatici. Le fonti da cui sono attinti i dati sono spesso contraddittorie. Nel dubbio si è adottato il criterio della massima convergenza. Il clima, negli ultimi 20 anni sotto la pressione demografica, ha subito drammatici cambiamenti e la meteorologia non è una scienza esatta. Prendete i dati che seguono come probabilità più che certezza. C'è chi è stato fortunatissimo in un periodo rosso e chi in uno verde non ha mai visto il sole. Ma statisticamente i valori che seguono sono una guida utile nella pianificazione.

In **verde** i periodi più favorevoli in termini di clima, precipitazioni minime soprattutto.

In **bianco** i periodi dove è senz'altro possibile una visita, ma la località non è al meglio.

In **rosso** i periodi sconsigliati per il clima, la folla, i prezzi anche se non significano un viaggio impossibile.
